

Antibiotics – handle with care!

Antibiotic Prescribing – A Checklist of Reminders

- ☐ Have the appropriate cultures been collected before starting antibiotic therapy?
- ☐ Do the culture results necessitate starting antibiotic therapy or modifying ongoing the current antibiotic therapy?
- ☐ What is the optimal duration of antibiotic therapy for treating this type of infection in this patient?
- ☐ What is the appropriate antibiotic dose for treating this kind of infection in this patient?
- ☐ Does the choice of antibiotic therapy comply with your hospital's antibiotic resistance patterns (antibiogram)?
- ☐ Have you consulted your infectious disease physicians, microbiologists or pharmacists?

Antibiotics

– Misuse leads to antibiotic resistance
